MEDASSURANT™

ARE YOU READY TO TRANSFORM THE HEALTH CARE INDUSTRY?

MedAssurant, Inc. is a leading provider of nationwide medical data analysis and collection solutions for the U.S. health care industry. We perform advanced data analytics on medical claims information and use the insight generated to implement targeted medical data collection from hospitals, providers and patients. Our services enable health plans to reduce costs and improve quality.

Why MedAssurant?

MedAssurant is technology-enabled, fast-paced and innovative. We develop solutions that shape the future of the healthcare industry. MedAssurant employees are driven professionals, many of whom joined the team early in their careers and have grown and advanced professionally during their time with the Company.

Based in the Washington, D.C. area, MedAssurant is one of the nation's largest healthcare technology solution providers. MedAssurant is a growth company that has tripled in size over the last three years to more than several thousand employees. Our continued rapid growth demands that we attract bright, talented and customer-focused team-players.

In MedAssurant's high-energy environment, you will put your strong technical, analytical and problem solving skills to work. You will be provided with the exciting opportunity to start your career in the Health Information Technology (HIT) field – one of fastest growing technology industries.

GROW YOUR CAREER: MEDASSURANT'S IT DEPARTMENT

MedAssurant's IT department is made up of several hundred employees. We work in a dynamic team focused environment where you can get to know your co-workers during creative team-building activities and after work social events.

MedAssurant invests in the development and growth of our employees by offering additional development opportunities for all associates including company-wide trainings and weekly "lunch-and-learn" programs.

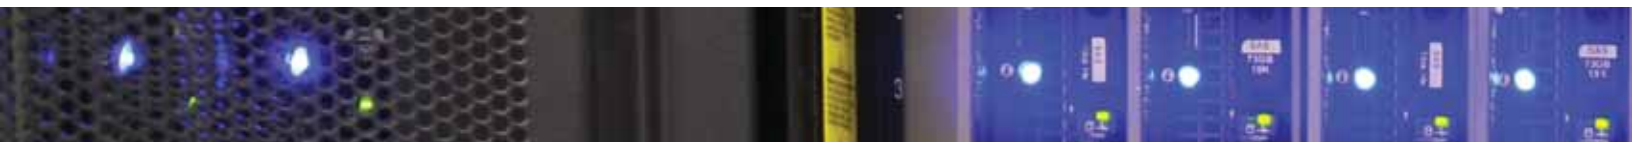

“I have a good time working at MedAssurant. I am able to apply my skills and experience to my job, while having the opportunity to learn something new every day.

I strongly believe everyone has ample opportunities to advance in career, learn architecture/design and improve processes without any restrictions.”

– Gokul Govindan
Srinivasan,
Senior Software Development
Engineer

“MedAssurant is an exciting and dynamic company to work for. Every day brings up new challenges and along with those challenges are opportunities for growth. This is a great place to gain some serious industry experience. In the booming Healthcare IT industry, MedAssurant is a trend-setter.”

– Benjamin Wolf,
Director of Enterprise
Application Operations

CHOOSE YOUR PATH: MEDASSURANT'S DEVELOPMENT PROGRAM

MedAssurant's Development Program provides the transfer of knowledge and the building of capability in our associates. Initially all program participants will spend time on an orientation team and will learn about our Agile development methods and systems. You'll then have an opportunity to focus on your specific area of interest – databases, applications or infrastructure.

Database Development

- Data Analysis
 - Healthcare data analytics using SQL Server 2008
 - Reporting using SQL Server Reporting Services
- Data Warehousing
 - Business Intelligence / ETL process design
 - Dashboards, scorecards, portal-based analytic solutions

Application Development

- Web Clients
 - ASP.NET using C#/WCF/WIF
 - Silverlight / HTML 5 user interfaces
- Windows Clients
 - .NET using C#/WPF/WCF/WIF
 - Business process systems development

Infrastructure

- System Administration
 - Management of VMWare ESX virtualized servers
 - Exchange / Active Directory administration
- Network Operations
 - Network analysis
 - Cisco router / switch configuration

YOU'LL HAVE A TEAM SUPPORTING YOU

Each program participant will work with a mentor who will have a minimum of five years of experience in your chosen professional track. Throughout the year, you can expect to meet with your mentor for feedback sessions, one-on-one development and advice.

MEDASSURANT™

January 1, 2012

Dear Students:

Congratulations on your upcoming graduation. As you evaluate potential employers for your important transition into the professional workforce, I encourage you to learn more about our growing organization. MedAssurant is a leading technology-enabled healthcare solutions provider focused on the importance of healthcare data and its ability to drive dramatic improvements throughout the healthcare community. Headquartered outside of Washington D.C., MedAssurant is seeking talented computer science and information systems graduates to be part of a rapidly expanding team of technical professionals advancing data analytics in healthcare.

Being part of the MedAssurant team will give you the opportunity to have a positive impact on the lives of more than 100 million Americans who MedAssurant touches through our many client relationships. MedAssurant provides local and national health insurance plans, care delivery networks, employers, pharmaceutical companies, regulatory bodies, and government organizations with powerful, turnkey services to improve care coordination and management, clinical and quality outcomes, claims and payment integrity, and healthcare data intelligence.

Our fast-paced and energetic work environment is driven by a mission to improve the nation's healthcare system. With our ability to leverage the latest enterprise software development, operational and infrastructure technology solutions, we offer the opportunity for extensive professional and technical growth. We've included some information about us in this packet, but I also invite you to visit our website at www.medassurant.com to learn more about our growing organization.

Sincerely,

Gregory Jones
Chief Technology Officer
MedAssurant, Inc.
